

## ***Stems, Prefixes, and Suffixes***

### ***Unit 4: Human Body Systems***

| <b><i>Stem</i></b> | <b><i>Definition</i></b>       | <b><i>Example term</i></b> |
|--------------------|--------------------------------|----------------------------|
| adipo-             | fat                            | adipose                    |
| -algia             | pain                           | fibromyalgia               |
| cardio-            | heart                          | cardiologist               |
| derm-              | skin                           | dermatitis                 |
| -ectomy            | removal of                     | hysterectomy               |
| epi-               | upon                           | epidermis                  |
| gastro-            | stomach                        | gastroenterologist         |
| -graph             | instrument used to record data | angiograph                 |
| hepato-            | liver                          | hepatitis                  |
| hyper-             | above                          | hyperglycemia              |
| hypo-              | below                          | hypodermic                 |
| -itis              | inflammation of                | meningitis                 |
| myo-               | muscle                         | myopathy                   |
| nephro-            | kidney                         | nephron                    |
| -oma               | tumor                          | carcinoma                  |
| -osis              | process/condition              | diagnosis                  |
| osteo-             | bone                           | osteocyte                  |
| -pathy             | disease                        | cardiopathy                |
| pulmono-           | lung                           | pulmonologist              |
| -scope             | instrument for viewing         | endoscope                  |
