

Earth's atmosphere reflects or absorbs some sunlight but allows most _____
_____ pass through to Earth's surface.

Gases and Radiation

List 4 ways the atmosphere can affect light

Define Ozone

--

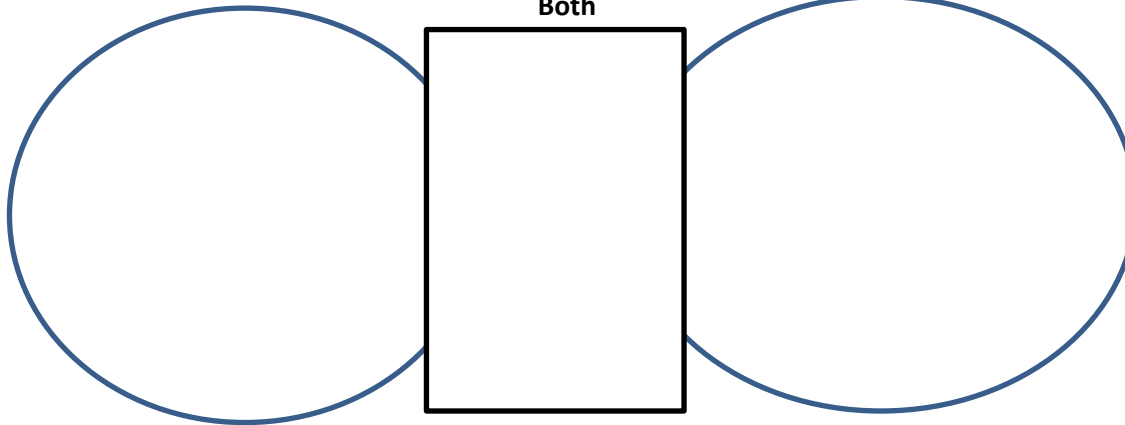

**List Characteristics
for the Ozone**

Complete the Venn diagram comparing ultraviolet radiation and infrared radiation

Ultraviolet Radiation

Both

Infrared Radiation

The Ozone protects Earth by:

--

Describe 3 characteristics for Greenhouse Effect

Describe greenhouse gases
and list examples

--

How does the greenhouse effect
interact with the Sun's energy?

--
