

# Energy Transformation Game

Draw 3 columns in your notebook and label as follows. Write the Picture in the 1<sup>st</sup> column, use the key to write the Initial Energy Type in the 2<sup>nd</sup> column, use the key to write the types of energy the initial energy type Transfers To in the 3<sup>rd</sup> column (there may be more than one type in the 3<sup>rd</sup> column)

KEY:            Em = electromagnetic            E = electrical            C = chemical            T = thermal  
                  N = nuclear            Mp = mechanical potential            Mk = mechanical kinetic

Picture	Initial Energy Type	Transfers To ...
Sun	N	Em , T
