

1. Fold like the copy paper like a hotdog bun.
2. Next fold the paper into 8 section.
3. On the front of the paper list the following words.

Altitude

Atmosphere

Buoyancy

Cycle

Density

Matter

Molecule

Sea Level

4. Define the words using the textbook found on the bookshelf. Write the definitions on the inside of the paper (on the left-side). Draw a picture to go with the word. You may use a reliable website to find definitions if the book is not available
